

Study Participation Opportunity

If you are over 18 years old and have used crowdfunding to help with expenses related to a cancer diagnosis, you may be eligible to participate in research.

Crowdfunding for Cancer

Many cancer patients use crowdfunding websites like GoFundMe to raise money.

This study will help researchers understand how cancer patients use these websites and what their experiences are like.

Participants in this research will be interviewed for about an hour. The study does not involve medical procedures.

Participants will receive an Amazon gift card worth \$20 to thank them for their time.

Interviews are remote by Zoom or in person if COVID restrictions permit.

Are you eligible?:

- 18 years of age or older
- Speak English
- Diagnosed with cancer
- Using crowdfunding to help with medical expenses

To schedule an interview, email
