

Vial of Life

Tanya R. Lattin, NREMT-P/FC is a nationally registered paramedic and fire commander for the Corrales Fire Department. She has been active with the fire department for 20 years and has been involved in Emergency Medical Medicine for many of those years.

In this breakout session Tanya will cover a number of issues involving medical communications and hints to make your experience with the fire department, ambulance service, or the hospital emergency room more efficient and easier for everyone.

She will cover such things as carrying some important papers with you and present The Vial (or File) of Life, what information is needed to complete it, and how to display it. She will discuss EMS, DNR and MOST orders. Information on choosing home or hospital hospice will be discussed

In this world of smart phones, Fitbits and Jawbones, Tanya will discuss the ICE concept and how to apply it as well as other available options like lock boxes for keys. This session will leave everyone better prepared to face their future!
